

Banner Alzheimer's Institute

BANNER ALZHEIMER'S INSTITUTE

The Mission

Ending Alzheimer's disease without losing a generation, setting a new standard of care for patients and their families, and forging a model of collaboration in biomedical research.

Facing Alzheimer's Together

Banner Alzheimer's Institute operates a Memory Disorders Clinic staffed by memory loss specialists who employ a multidisciplinary approach to diagnose and treat Alzheimer's disease and other forms of dementia. The Clinic staff is supported by a team of nurses and social workers who meet the non-medical needs of patients and caregivers by providing disease education, resource referrals, strategies for dealing with communication and behavioral issues, and tips for successful day-to-day living.

In addition to its clinical services, Banner Alzheimer's Institute is a recognized leader in Alzheimer's research, with ongoing studies in the areas of brain imaging, clinical trials and genomics.

As part of the Arizona Alzheimer's Consortium, Banner Alzheimer's Institute provides:

- A care model dedicated to meeting the medical and non-medical needs of patients and their care partners
- Pioneering brain imaging research focused on tracking the development of Alzheimer's disease before the onset of symptoms, and testing the effectiveness of potential prevention therapies
- A diverse portfolio of clinical research opportunities for qualifying participants who wish to participate in clinical trials of experimental treatments
- Collaboration with the Translational Genomics Research Institute to evaluate the role of genes in the development, progression, and treatment of Alzheimer's disease

About Banner Alzheimer's Institute

The Banner Alzheimer's Institute is a treatment and research facility dedicated to helping patients with memory and thinking problems. It offers clinical care for patients; provides education, referral and support services for family and caregivers; and conducts leading-edge research in clinical trials, brain imaging and genetics studies.

The Institute is devoted to finding effective Alzheimer's disease-slowing and prevention treatments in the shortest time possible. Banner Alzheimer's Institute is owned and operated by Phoenix-based Banner Health, a nonprofit organization.
