## BARROW NEUROLOGICAL INSTITUTE AT ST. JOSEPH'S HOSPITAL AND MEDICAL CENTER

### The Mission

Barrow Neurological Institute at St. Joseph's Hospital and Medical Center's mission is to advance the knowledge and practice of medicine in neuroscience through basic and clinical research, education of medical professionals and innovation in clinical techniques and technology.

### Facing Alzheimer's Together

The Cognitive Disorders Program at Barrow uses a multi-disciplinary approach to assess and treat patients with disorders related to memory loss, dementia, Alzheimer's disease and other cognitive problems. Barrow patients have access to a variety of clinical trials and medications while family members can utilize the hospital's educational resources and support services. St. Joseph's also operates the Huger Mercy Living Care Center, a 48-bed dementia care program in a homelike setting with around-the-clock-care. As part of the Arizona Alzheimer's Consortium, Barrow provides:

- Sophisticated imaging and technology and expertise in functional and structural neuroimaging
- Outreach programs and educational opportunities to the community, particularly minority groups
- Basic and translational research leadership in the areas of normal and advanced aging
- Access to a large volume of neurological patients with varying diagnoses and demographic characteristics

### About Barrow Neurological Institute

Barrow Neurological Institute at St. Joseph's Hospital and Medical Center is an internationally renowned medical center that offers care for individuals with brain and spine diseases, disorders and injuries. *U.S. News and World Report* routinely ranks St. Joseph's among the best hospitals in the United States for neurology and neurosurgery. Dr. Robert Spetzler, one of the world's leading neurosurgeons, is the director of the institute. Barrow treats patients with a wide range of neurological conditions, including brain and spinal tumors, cognitive disorders, cerebrovascular conditions, and neuromuscular disorders. Barrow's clinicians and researchers are devoted to providing excellent patient care and finding better ways to treat neurological disorders.
